

# Notes from Mockup Review

Lily Wu

11/20/2019

## Project Title: Tama Website

Designer/Developer: Alec O'Brien

### General notes

- Colors provide good contrast and help to make elements (images, text) stand out
- Easy to navigate organization
- Content is broken up into sufficiently small paragraphs that are easy to read

### Notes for building

- Make sure the landing page has a high res pic since it spans the whole screen
  - Top content (title, menu) can be smaller to highlight more of the picture
  - Okay for picture to spill over so that reader is inclined to scroll down
- Maybe a different header font (more round?)
- Image borders are cool, make sure to have consistent padding
  - Captions in white text?
- 'Back to top' link may be useful at the bottom of the page
- Overview and Early Life parts can be combined since both are relatively short
